

ENERGY SAVING TOP TIPS

MEDIA CITY

Here are some simple tips from our energy team to reduce your energy consumption. Every little helps and we can all play our part!

1. Turn off all equipment that's not being used. You can also avoid unnecessary energy use by turning off all communal electricals at the end of the day.
2. Change lighting to LED where possible, not only do they have a longer life but are much more efficient as well.
3. Try to take the stairs instead of the lift. Not only does it have health benefits, you're also saving energy!
4. Run a service on all vehicles and machinery as often as possible, this will help to keep their energy use at an efficient level.
5. Avoid changing settings on thermostats / radiators. These will have been set to run as efficiently as possible.

Communication is key! Share your ideas to raise awareness with colleagues, and let's get people talking about energy reduction
